

## PLAN NOTES:

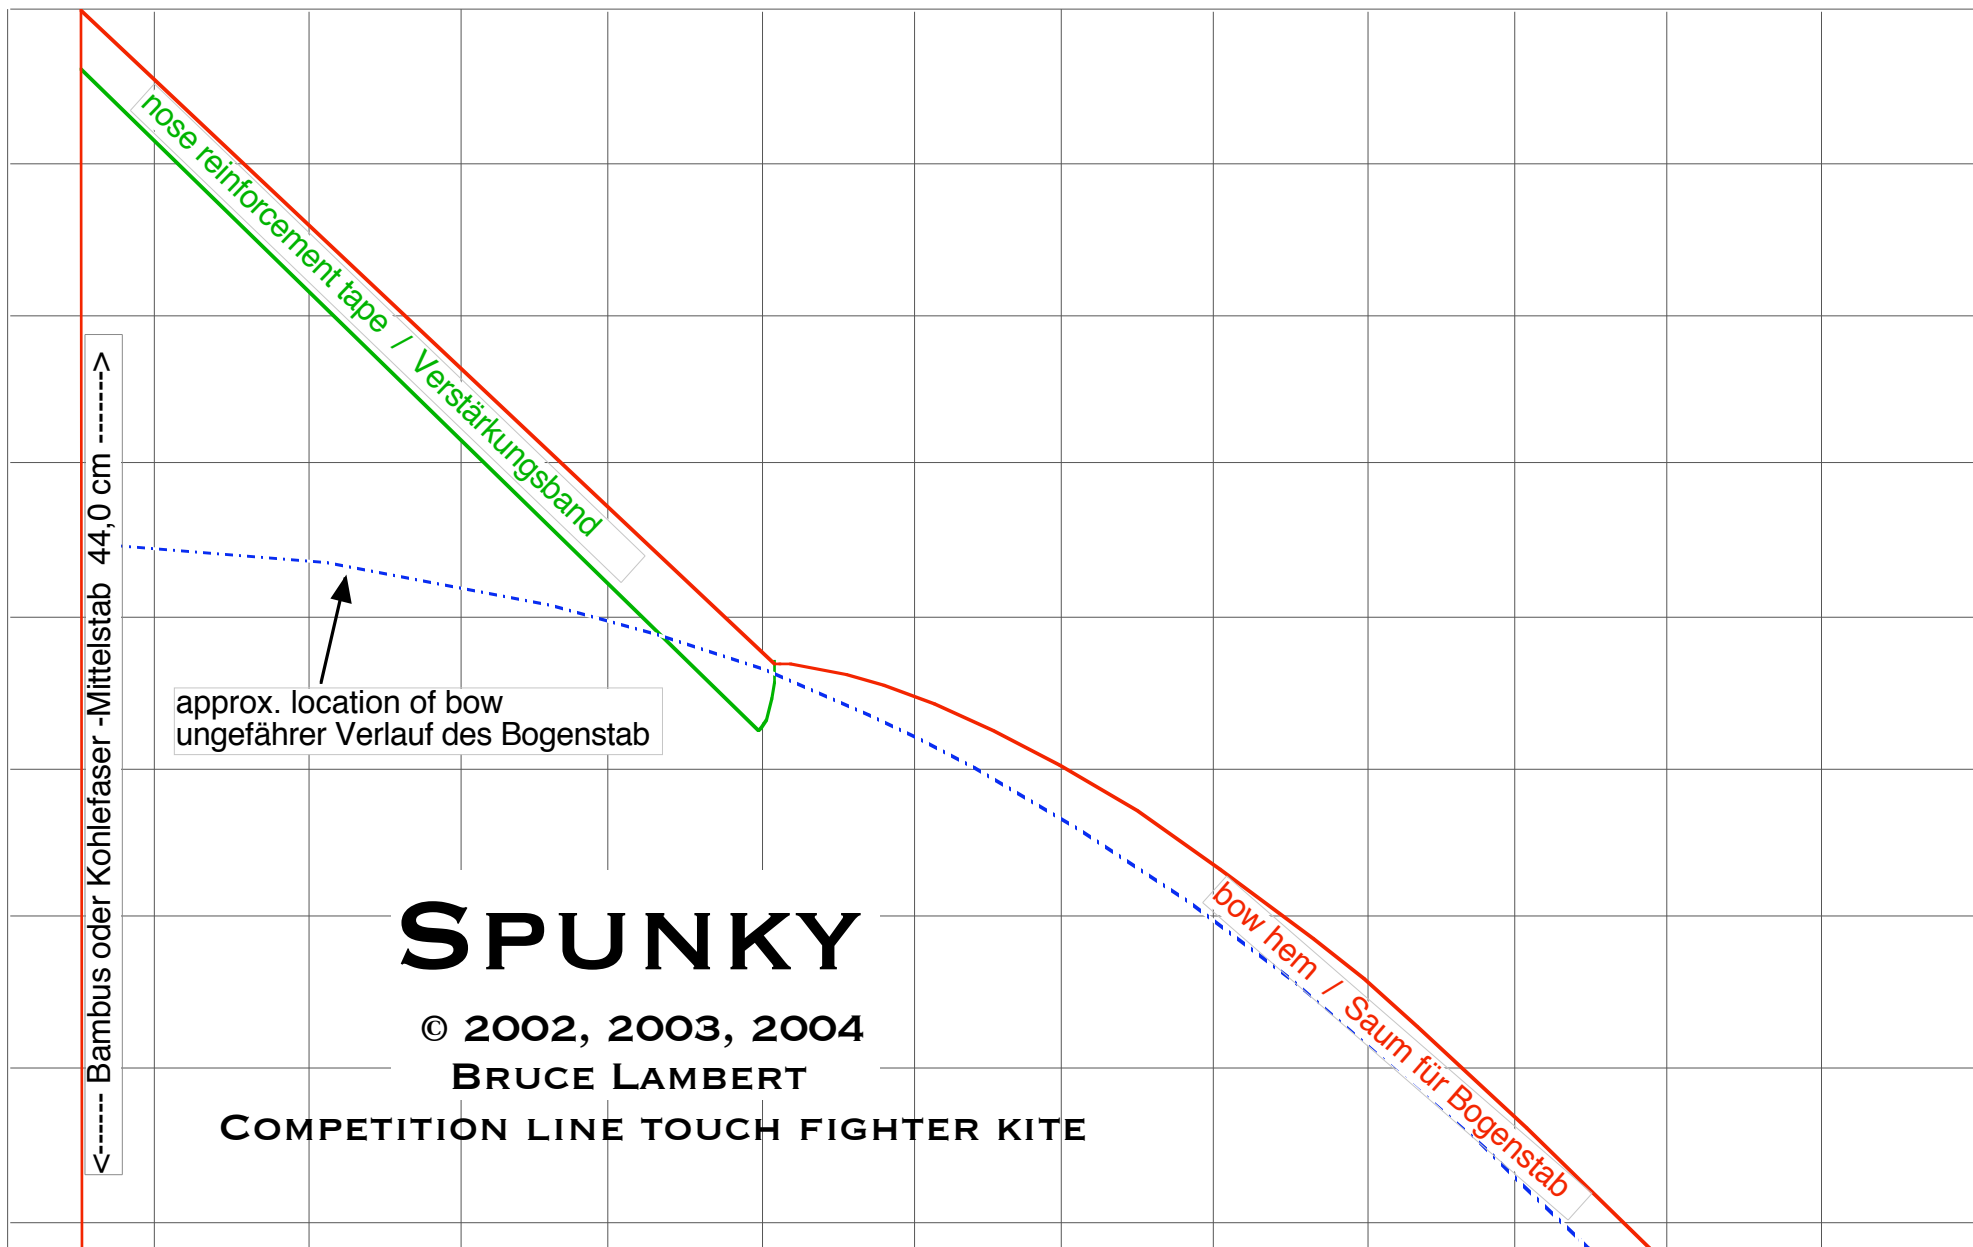

Spunky is a modified and I think improved version of Donna'sDog. Donna'sDog is also called the NAFKA STANDARD. Sort of confusing, I know.

I designed Donna'sDog using a 0.05" diameter carbon fiber bow for my wife Donna. She loves flying it and it's still her favorite kite!

I flew Donna'sDog with great success in line touch competitions including winning the Line Touch World Cup with it. I flew it with with an 0.50" & in stronger winds with an 0.06" diameter carbon fiber bow.

After flying it many more hours, I made some slight changes that I think enhance all its flight characteristics a little and named the revised version SPUNKY. But you may want to make both Donna'sDog and Spunky and test the two yourself.
