

„Summer 05“

The „summer 05“ fighter is designed for light to middle wind conditions, the kite is easy manageable also for beginners !

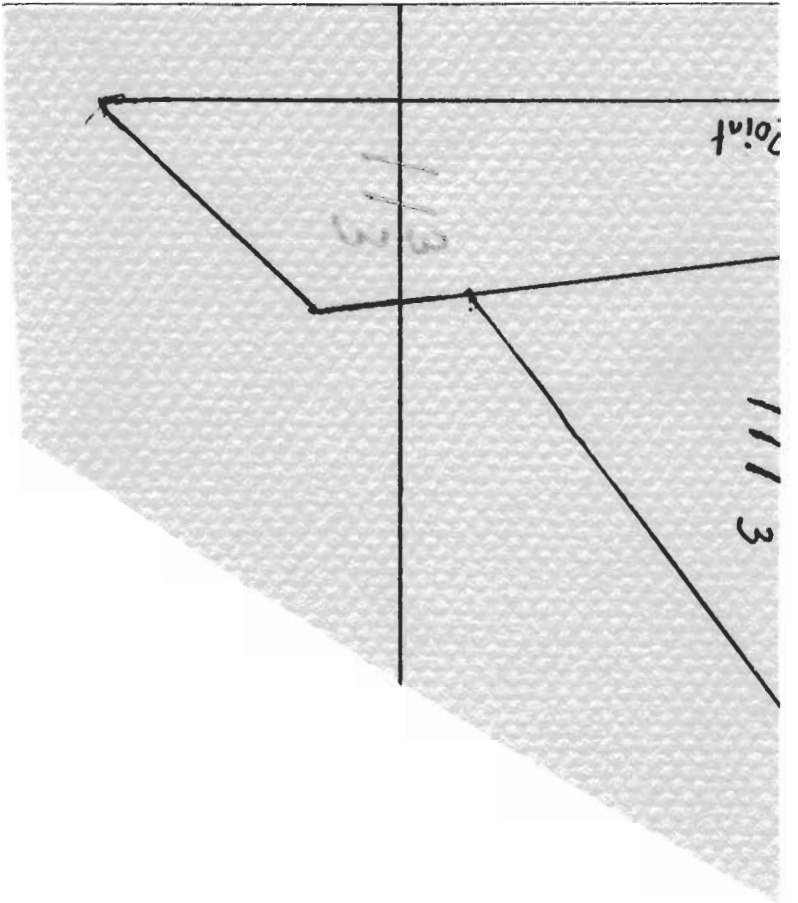

The bow is a 0,05” carbon, the battens are 0,030”, you can also use only 4 battens but this will make the kite a little bit slower....

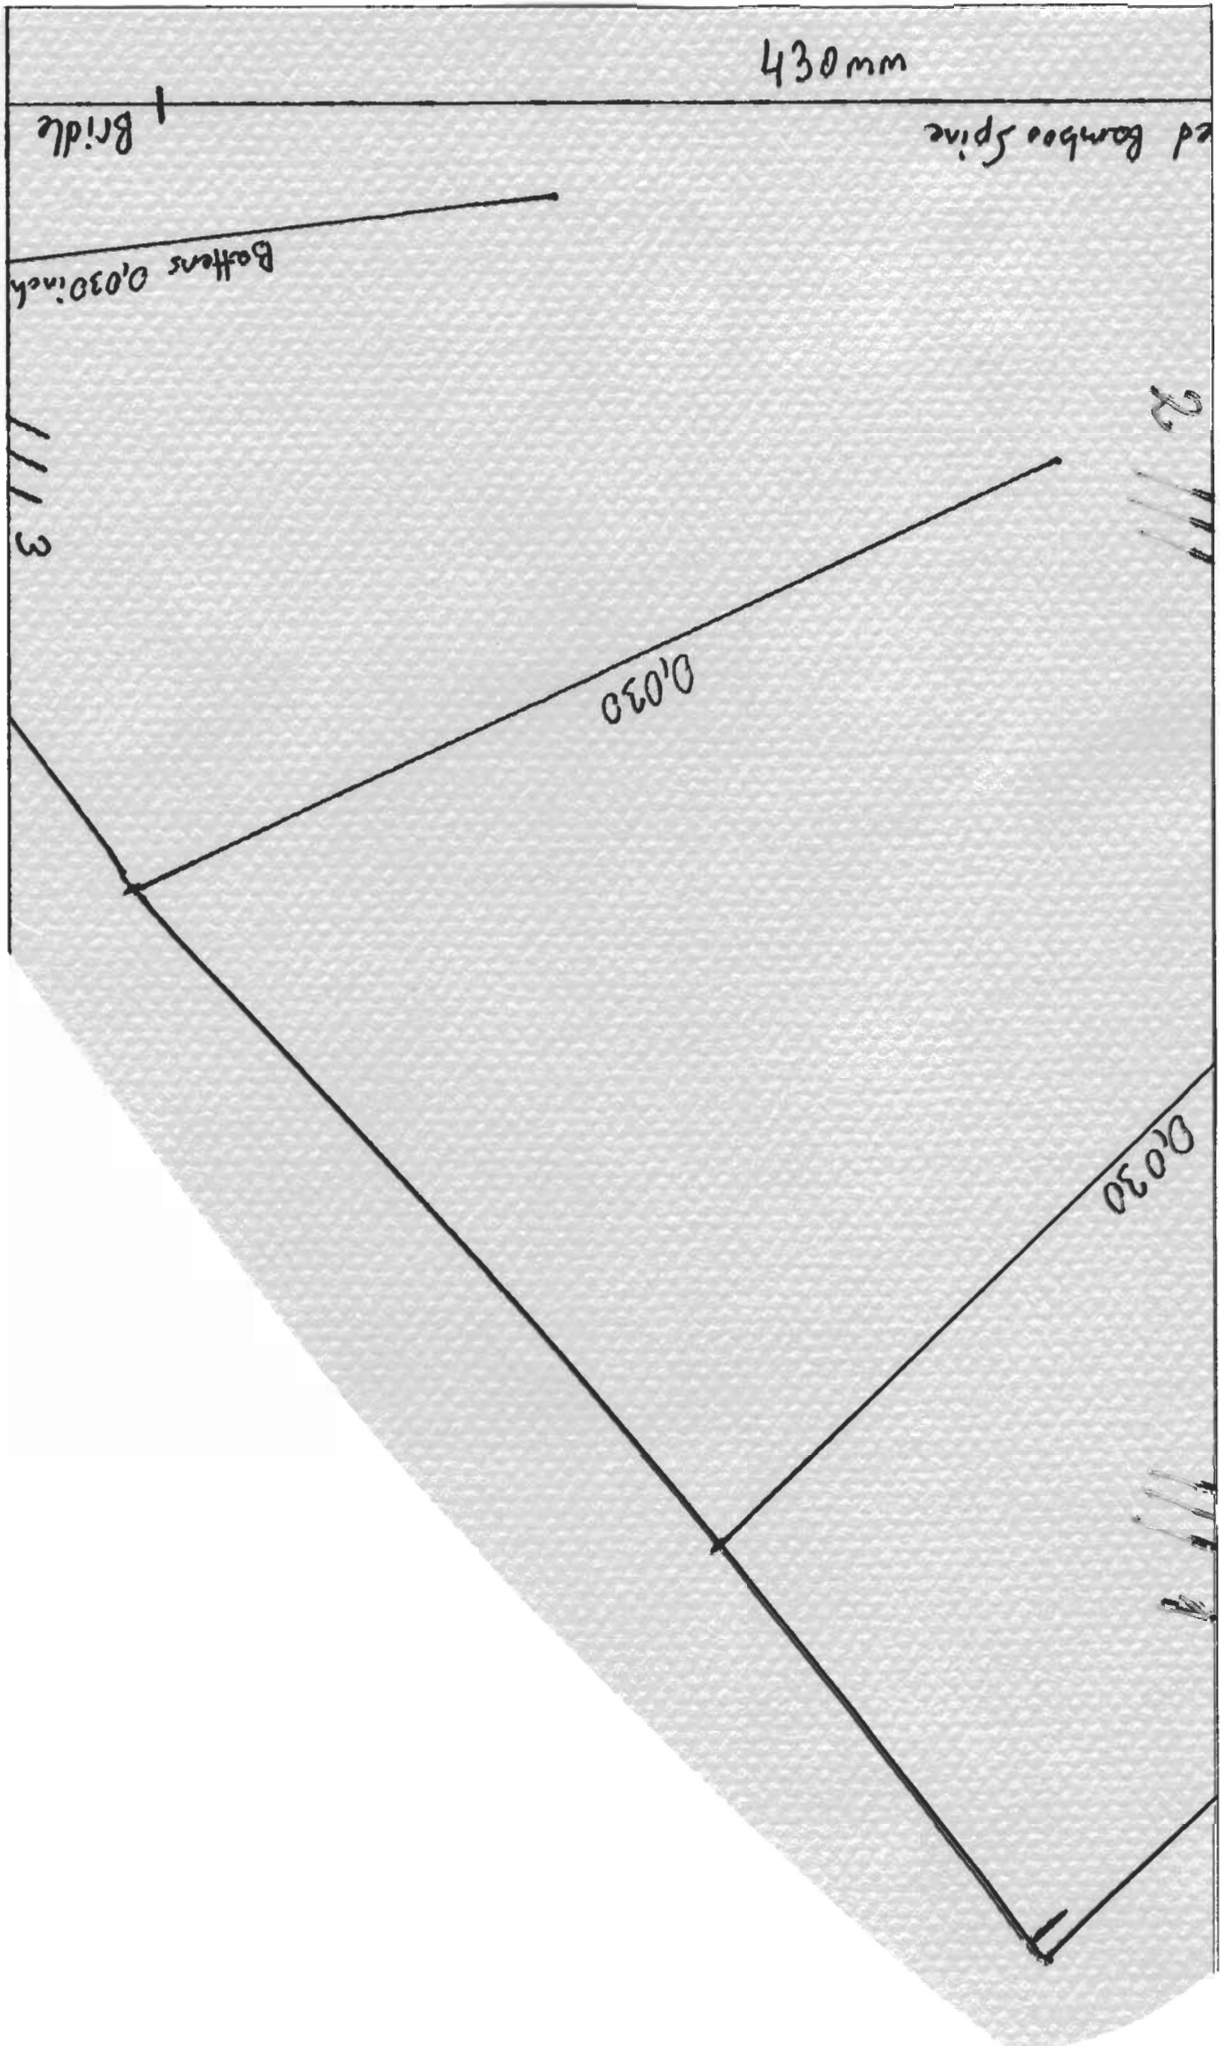

Important is the wide reinforcement on the leading edge.

I hope you will have fun with this kite
